I have nothing to compare it to, but overall this was a good first step for someone who knows NOTHING about physics. ...more Jul 07, 2019 Stasia Reviewed I really liked it I feel like this would be worth buying if I decided to pursue physics more seriously along the way. If this is a physics book you're looking for, I suspect this is one of the best. Even though the book uses equations, it's rare commodity. All the main concepts, explained concisely but clearly. And physics so there's still a lot of math, but he tries to simplify to understand the concepts. I highly recommend this book to get a basic understanding of our p I was watching a show called "Space's Deepest Secrets" and they were referring to many different laws of physics and I realized I've never taken a physics course. I think if you are a student and you need to memorize and use a lot of facts, formulas and definitions this book would be good. It's a nice exercise. What do I mean by that? The explanations are too concise and omit the definitions and details needed to understand them, beyond the mechanical application of formulas to the fact that I "read" this so much that as soon as I started reading it, I took several pages and realized it was not at all what I expected. He tries to explain concepts of physics concisely and provides exercises to work on, but in many places he uses concepts he has not explained or defined correctly. I would like to give the author and the publisher the benefit of the doubt in thinking that they made sure everything was correct before it was published, so that confused me. I stopped reading it because I thought it would be better to use the time to take online courses that only cover a few topics at a time, but cover them much more thoroughly. 21 May 2019 Kevin Zuech rated it was amazing I was watching a show "Spaceâ €™ s deepest secrets" and referred to numerous different physics laws and I realized that I had never followed a physics lesson. ... piu de 04, 2020 2020 retteb skcal tI .detceppe eb ot s'taht tub ,liated erom rof pu sgnih wef a kool ot dah I .s'koob eht naht rehtar newsna *ym* htiw eerga dluow taht secruos etanretla hcraeser d'I .noitcudortni taerg A .ylraelc STPECNOC eht ehnomed dna etercnoc era elpmaxe eht .Didug gnihaet-fles that nhuk scisab sisab edug gnihaet-fles that :scisyhp sabohs sinwoh so ,LEW .DIDUG DNIK-A-FO-ELO siht FO PLEH EHT HTEW STOIUDE SCISYHP ecnahne yltaerg scasyhp gnirael-er ?
